Aim of the Event

To bring awareness among students, Staff and public on Environmental assessment, importance of plants to give pure oxygen.

Programme procedure

Department of Botany organised National webinar on “ World Environment Day’ the chief guest is Dr.KSR Gopalan, Founder, Snigdha Group of Ayurvedic Hospitals.He explained about the balance of oxygen and carbon dioxide in the environment. Day to day the level of CO₂ increasing and the level of O₂ is decreasing.so it urgent need of the public to pay attention to increase the level of CO₂ , hence all the public should understand the importance of environmental for the next generation, during pandemic period, the hospitals are filled with patients but no oxygen supply. They established artificial oxygen plants. Keeping this in view, it’s the duty of

world environment day 2021

Definition

Ecological restoration

It is the process of assisting the recovery of an ecosystem that has been degraded, damaged, or destroyed. It is an intentional activity that initiates or accelerates an ecological pathway—or trajectory through time—towards a reference state.

THE RESTORATION CONTINUUM

Improving biodiversity, ecological integrity, and ecosystem services

World Environment Day
Save the earth, Plant a tree

Pollution can Cause Climate change
So in stead Save the penguins and coral reefs!
RIDE A BICYCLE
Don't drive a Car too much!
There is hope when we help!

Plant More Trees
Planting trees is essential for restoring degraded plant and animal systems. In fact, they bring us oxygen, they are healthy, they are beautiful, they provide shelter for wildlife, they are windbreakers, and they are beautiful.

Environmental Issues
It is very important to keep the environment clean, because the Earth is our home. In the place where we breathe, eat, live, sleep, laugh... We keep polluting the environment and it is not only bad for us, but for all the living.

We pledge to take care of the Earth!
recycle
don't litter
reduce
reuse
make it
